A SEAMLESS AV INTEGRATION MT LAWLEY RENOVATION

THE MT LAWLEY RENOVATION PROJECT SOUGHT TO BLEND A TOP-NOTCH AV SYSTEM INTO AN ELEGANT MOUNT LAWLEY FAMILY HOME, ALL WHILE MAINTAINING THE EXQUISITE INTERIOR DECOR.

SUMMARY

The Mt Lawley Renovation project aimed to seamlessly integrate an AV setup into a beautiful family home in Mount Lawley while preserving the high-quality decor. The primary objective was to deliver an amazing surround sound experience without the technology detracting from the room's aesthetics. The project uniquely incorporated Sonance Invisible speakers to achieve this, with the added benefit of detailed framing diagrams provided by the client, making the installation process smoother. The combination of Sonance IS-8 Invisible Loudspeakers, VP82R In Ceiling surround speakers, a compact SVS subwoofer, and a Samsung 85" Frame Television resulted in an inconspicuous and high-quality entertainment solution.

CHALLENGES AND INTERESTING ASPECTS OF THE BUILD

The project's most captivating feature was the client's involvement in generating intricate framing diagrams and taking photographs prior to sheeting. This exceptional client-driven effort significantly streamlined the installation process, guaranteeing ample space for the speakers and ideal positioning.

Additionally, the project's AV integrators introduced the client to the concept of Sonance Invisibles speakers. Initially, the client had considered a custom soundbar painted to match the wall color. Still, after experiencing the Sonance Invisibles at West Coast HiFi's East Perth Experience Centre, he agreed that these speakers not only sounded better but also seamlessly disappeared into the room's decor.

The ease of installation, thanks to a Sonance QR code that linked to an installation video, further streamlined the process.

KEY RESULTS

The combination of Sonance IS-8 Invisible Loudspeakers and VP82R In Ceiling surround speakers, complemented by a small, compact, gloss white SVS subwoofer, and a Samsung 85" Frame Television, resulted in the perfect entertainment solution for the open-plan living room. The discreet installation of these components ensured they seamlessly integrated into the room's decor, aligning with the client's vision for a high-quality entertainment system that did not disrupt the aesthetics of their home.

CONCLUSION

The Mt Lawley Renovation project is a testament to the successful collaboration between the client's proactive approach and the expertise of AV integrators. By introducing the client to innovative solutions like Sonance Invisible Series, they were able to exceed the client's expectations for a discreet and high-quality AV setup. The combination of advanced technology, detailed planning, and expert installation led to a harmonious fusion of entertainment and aesthetics in this stunning Mount Lawley family home.
